Project Description

-- Research and create a brochure for our US Embassy community children in Hanoi.
--Examples include, 3 top schools, parks, playgrounds, activities, malls containing children's activities, Facebook groups geared towards parents.
-- This project is important because Hanoi is considered a "hardship" post due to chaotic traffic, lack of green space, noise pollution and poor air quality. Offering children safe areas to hang out with friends helps to keep morale high within the Embassy community (Officers, spouses and children). Thanks for taking on this meaningful project! We can discuss details and expectations before you get started.
